DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11/8/02 has been entered.

Election/Restrictions

2. Applicant's election with traverse of Species I in Paper No. 18 is acknowledged. The traversal is on the ground(s) that there is no serious burden on the examiner to examine all claims. The traverse has been carefully considered, but is not persuasive because the reasons proffered do not appear germane to the propriety of a requirement for election of species. The sections of the manual cited relate to restriction, not a requirement for election of species, which is clearly covered in section 808.01(a). Once the claims are determined to be directed to mutually patentable inventions and the Office requires an election of species, a persuasive traverse is an admission on the record that applicant does not find the claimed species are patentable, one over the other. Having not done so, the reasons presented are not persuasive. Applicant is not entitled to examination of multiple independent inventions in one application. Moreover, examination of the independent inventions herein would clearly present a burden because the searches will not be coextensive. Accordingly, the requirement is repeated and made final. Species II will be combined if applicant will stipulate that they are obvious over each other.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 24-25 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Abe (US 5,746,868).

Abe discloses in Figs. 1A-1E simultaneously and unitarily forming element 9 with protrusions and wiring patterns as well as deforming to form flat tops of element 9. Element 9 contains sintered product (col. 6, line 4).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 29-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Abe (US 5,746,868) in view of Official Notice.

Abe teaches the invention as described with respect to claims 24-25.

Abe fails to disclose coupling electrically the protrusion with a semiconductor chip component.

Official Notice is taken that it is well known in the art to coupling electrically the protrusion with a semiconductor chip component to form a motherboard.

Art Unit: 3729

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Abe by coupling electrically the protrusion with a semiconductor chip component, as taught by Official Notice, for the purpose of forming a motherboard.

Response to Arguments

7. Applicant's arguments with respect to claims 24-25 and 29-30 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

8. **Applicants are duly reminded that a full and proper response to this Office Action that includes any amendment to the claims and specification of the application as originally filed requires that the applicant point out the support for any amendment made to the disclosure, including the claims. See 37 CFR 1.111 and MPEP 2163.06.**
